## Abstract of the Disclosure

- This Automatic Braking System is regarded as an invention to help every driver to brake one's car automatically due to unexpected event or event beyond driver's attention. It does not exist in automobile industry.

1. The present invention relates to an automatic braking system for a vehicle. The system is designed to detect an unexpected event or event beyond the driver's attention and automatically apply the brakes to the vehicle. The system is intended to improve safety by preventing collisions and accidents.
